Marble Nouveau

Exceptional brightness. Our ROCA polished pavements and coverings are exceptionally bright, acquiring the distinctive and elegant finish of recently polished natural marble. This has been possible thanks to a major technical development that achieves this high degree of reflectivity and resistance in a much wider colour range than that offered by natural stone. This range includes a wide variety of natural marble finishes, with a colour spectrum that varies from the snowy white of Boheme Blanco to the intense black marbling of Sahara Noir, complemented with graphite finishes and the industrial touch of vitrified cement.
